The Symposium will focus on eight thematic areas, each addressing a grand challenge for Australia over the next decade (sovereignty, security and natural hazards; energy security; food security; biodiversity conservation and ecosystem health; dealing with climate change; optimal resource allocation; urban coastal environments; and infrastructure).

The Symposium will be attended by scientists, industry and government leaders.

Theme outcomes will be drawn together to inform the development of a National Marine Science Plan – a decadal plan prioritising marine science investment for Australia.

Details:
Australian Academy of Science Shine Dome, Acton, Canberra
Tuesday 25th and Wednesday 26th November 2014

Symposium registration (including lunch and refreshments) is complimentary.

A complimentary networking event will be held at the conclusion of Day One.
